

**Title: Embedded Software Engineer**

TELETEL SA, a leading company specializing in the aerospace and defense sectors in Europe & worldwide, is seeking for sharp, disciplined, and highly motivated software engineers to get involved with highly challenging product development and integration tasks mainly in the aerospace domain.

The basic skills that the ideal candidates should have, are:

- University degree
- Experience with C, C++ in embedded environments
- Professional software development experience between 2 - 5 years, preferably in the aerospace or defense sectors
- Excellent working knowledge of the English language
- Knowledge of software development standards and practices
- Be able to follow software requirements as well as to design, build and maintain efficient and reliable code

Extra skills to be considered as an advantage:

- Working knowledge of Python
- Experience with aerospace on-board communications (MIL-STD-1553, Spacewire, SpaceFibre, CAN, TTEthernet, TSN, etc.)
- Experience/familiar with drivers coding in Windows / Linux environments
- Experience with aerospace software development standards and practices (ECSS Cat.B equivalent)

The company offers cooperation with the leading aerospace industries in Europe, competitive salaries, a great working environment, and professional training to state of the art technologies. The open positions concern work in the company premises in Athens.

Applicants should send their CV in English to [hr@teletel.eu](mailto:hr@teletel.eu). For more information about the company please visit [www.teletel.eu](http://www.teletel.eu).
